THE NAME SAYS IT ALL

Dunedin City Council's unique and sustainable \$34 million **Wall Street** project came about after a Residents Opinion Survey indicated that ratepayers wanted the DCC to reduce reliance on rates increases by increasing external sources of income.

The Wall Street complex will use as many environmentally friendly features as possible including **Protect Crete Densi-Proof**.

Nick Richardson National Sales Manager from **Gilt Edge Industries** says " The project will complete May 2009 and the first stage of the 18,000m² is successfully finished. What is important to the contractor and DCC about the product is it is environmentally neutral, safe and user friendly."

Barrie Clydesdale the Principal of **Mulford Holdings**, whose floor division **Mulford Flooring**, won the floor contract has been impressed with the ease of application and the safety aspect of Densi-Proof for his staff, "It's green, clean and easy."

Left to right. **Blair McGill**, **Naylor Love** Project Manager, **Barrie Clydesdale**, **Mulford Holdings** Densi-Proof trained applicator and **Craig Kennelly**, **Gilt Edge Industries** Regional Manager – **Protect Crete** distributor on site at the start of stage 1.
