

Manufacturers of the world's most technically advanced systems for permanent concrete repair, moisture proofing and protection treatments.

THE NAME SAYS IT ALL

# DENSI-PROOF SURFACE REPELLER

BREATHABLE, TOUGH,  
INVISIBLE, LOW SLIP  
COATING.  
PROVIDES  
WATER AND  
STAIN RESISTANCE

## Stained Concrete Pavers Adelaide, South Australia

Here are some of the photos from Tom Raggatt's house (original Penfolds Homestead Circa late 1840's, one of Adelaide's first homes). Stains on the pavers from the timber decking above had resisted all previous attempts to remove them. Applied 1 coat of Densi-Proof™ and washed off within 30mins. 90% stain removed. Pressure washed clean and applied another coat of Densi-Proof™ and again washed clean approximately 2 hours after application. Applied Repeller the next day within 30 mins Surface Repeller™ would not penetrate itself as per photo. Customer very happy.

Densi-Proof™ penetrates deeply into concrete and purges contamination from within. Surface Repeller™ resists water, oils, acids and chemicals from the surface. These pavers will stay looking new and the colour will remain vibrant.

**DENSI-PROOF™ & Surface Repeller™ will improve your surfaces by preserving the original finish. Surface Repeller enhances slip resistance on wet and dry surfaces. Ask your Protect Crete representative or download the test reports.**

Ensure you contact your nearest  
**PROTECT CRETE®** office for full  
technical bulletins and latest  
application procedures.
